

Pilot activities addressing SCP national priorities

Meryem Cherif

Dafne Mazo

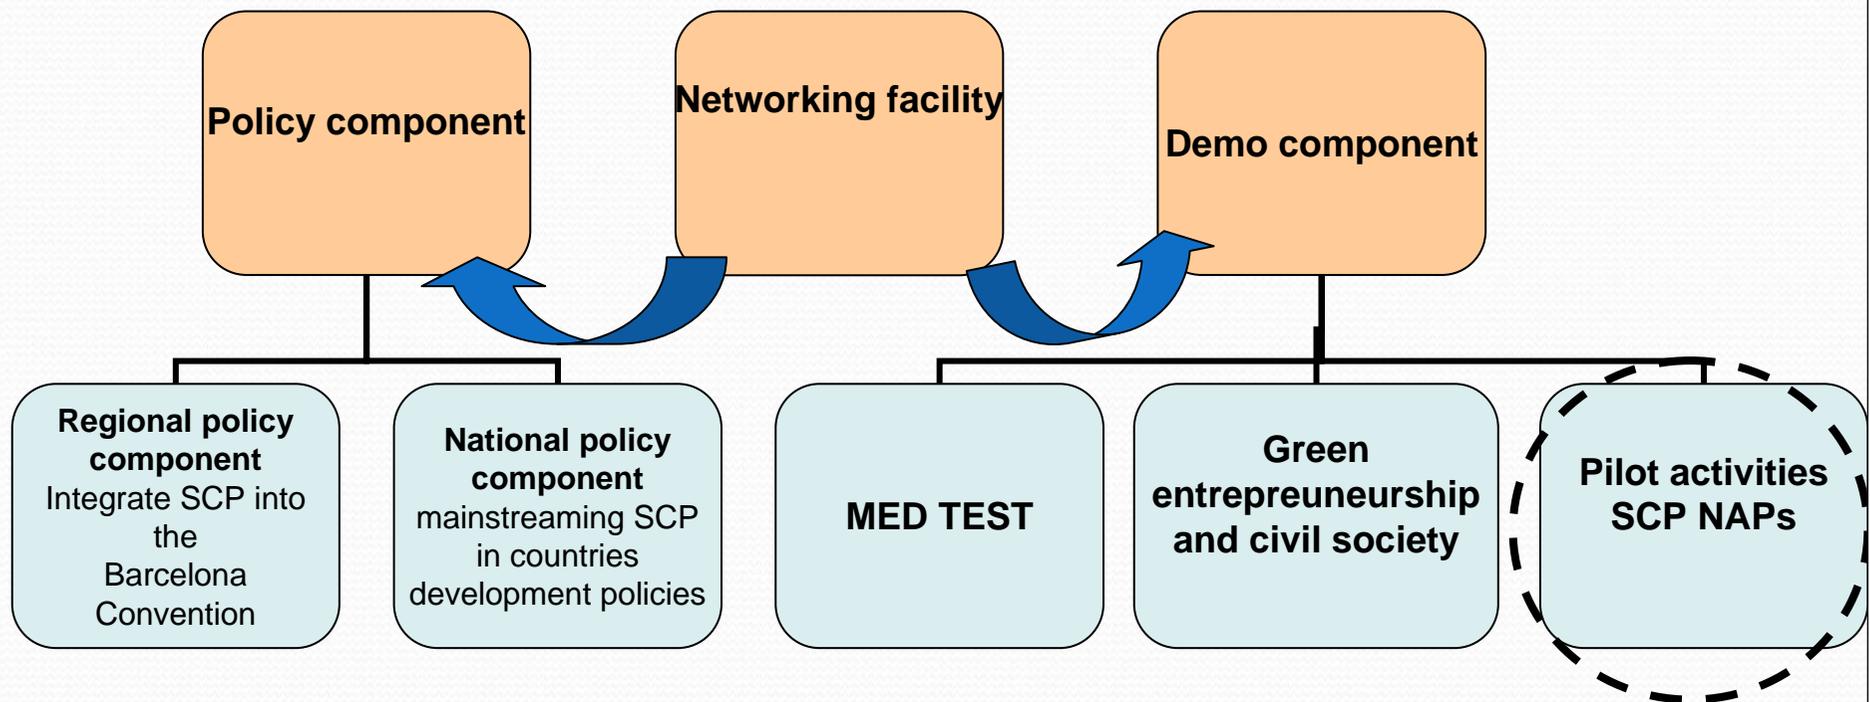

Frederic Gallo

June 20th, 2013

CP/RAC Focal Points Meeting

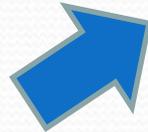

Pilot activities within SWITCH-Med

Methodology for Pilot Selection

Pilot activities with 2 main phases, depending on the policies already existing in the countries

Mainstreaming SCP priorities to be implemented coming **from existing SCP/GE/ SD processes** in country
Late 2013- 2015

Implementing priorities arising **from development of new SCP NAPs**
2015-2017

Around **10 demo projects**, focused on the priorities identified by the Med countries under the Barcelona Convention and its protocols

Methodology for identification of potential pilot activities

- Building on CP/RAC **past projects and expertise**
- Building on past **projects in the Med countries**
- Building on **action plans and strategies** already developed under other programmes that didn't get to implementation phase
- Ensuring linkage to (building on) national sustainable development, green economy strategies and policy frameworks and UNDAFs (being implemented)

12 possible proposals

Industrial practices

1. Implementation of the life cycle management in a key industrial sector such as dairy or textile
2. Eco-Design of Packaging
3. Reducing water pollution, water consumption and use of chemical fertilizers in the olive oil sector by the improvement of the oil extraction system and the composting of its wastes
4. Sustainable construction

Consumer awareness

5. Ecological Foot printing in the food industry
6. Linking POPs pesticides in blood and good environmental agricultural practices

Tourism and ICZM:

7. Sustainable Public Procurement (SPP) and the link to the Touristic Sector: the creation of a supplier network oriented to the adoption of ICZM strategies
8. Changing tourism practices: eco-tourism excursion
9. Sustainable buildings in the coastal areas

Waste management

10. Medical waste management

Mobility

11. Improvement of mobility and transport networks in rural & coastal zones
12. Design and management of 30kmh districts

Waste Management, Mobility

Waste management

10. Medical waste management

Mobility

11. Improvement of mobility and transport networks in rural & coastal zones

12. Design and management of 30kmh districts

Modalities at Country level

- Feedback from scoping missions in SWITCH-Med beneficiary countries (factsheets)
- To be submitted for approval to the SWITCH-Med coordination group
