Role of Institutions in the IPPC Implementation Procedure

ČESKÁ INSPEKCE
ŽIVOTNÍHO PROSTŘEDÍ

Czech Environmental Inspectorate (CEI)

a special government body supervising observance
of environmental acts and regulations, and controlling
permit compliance

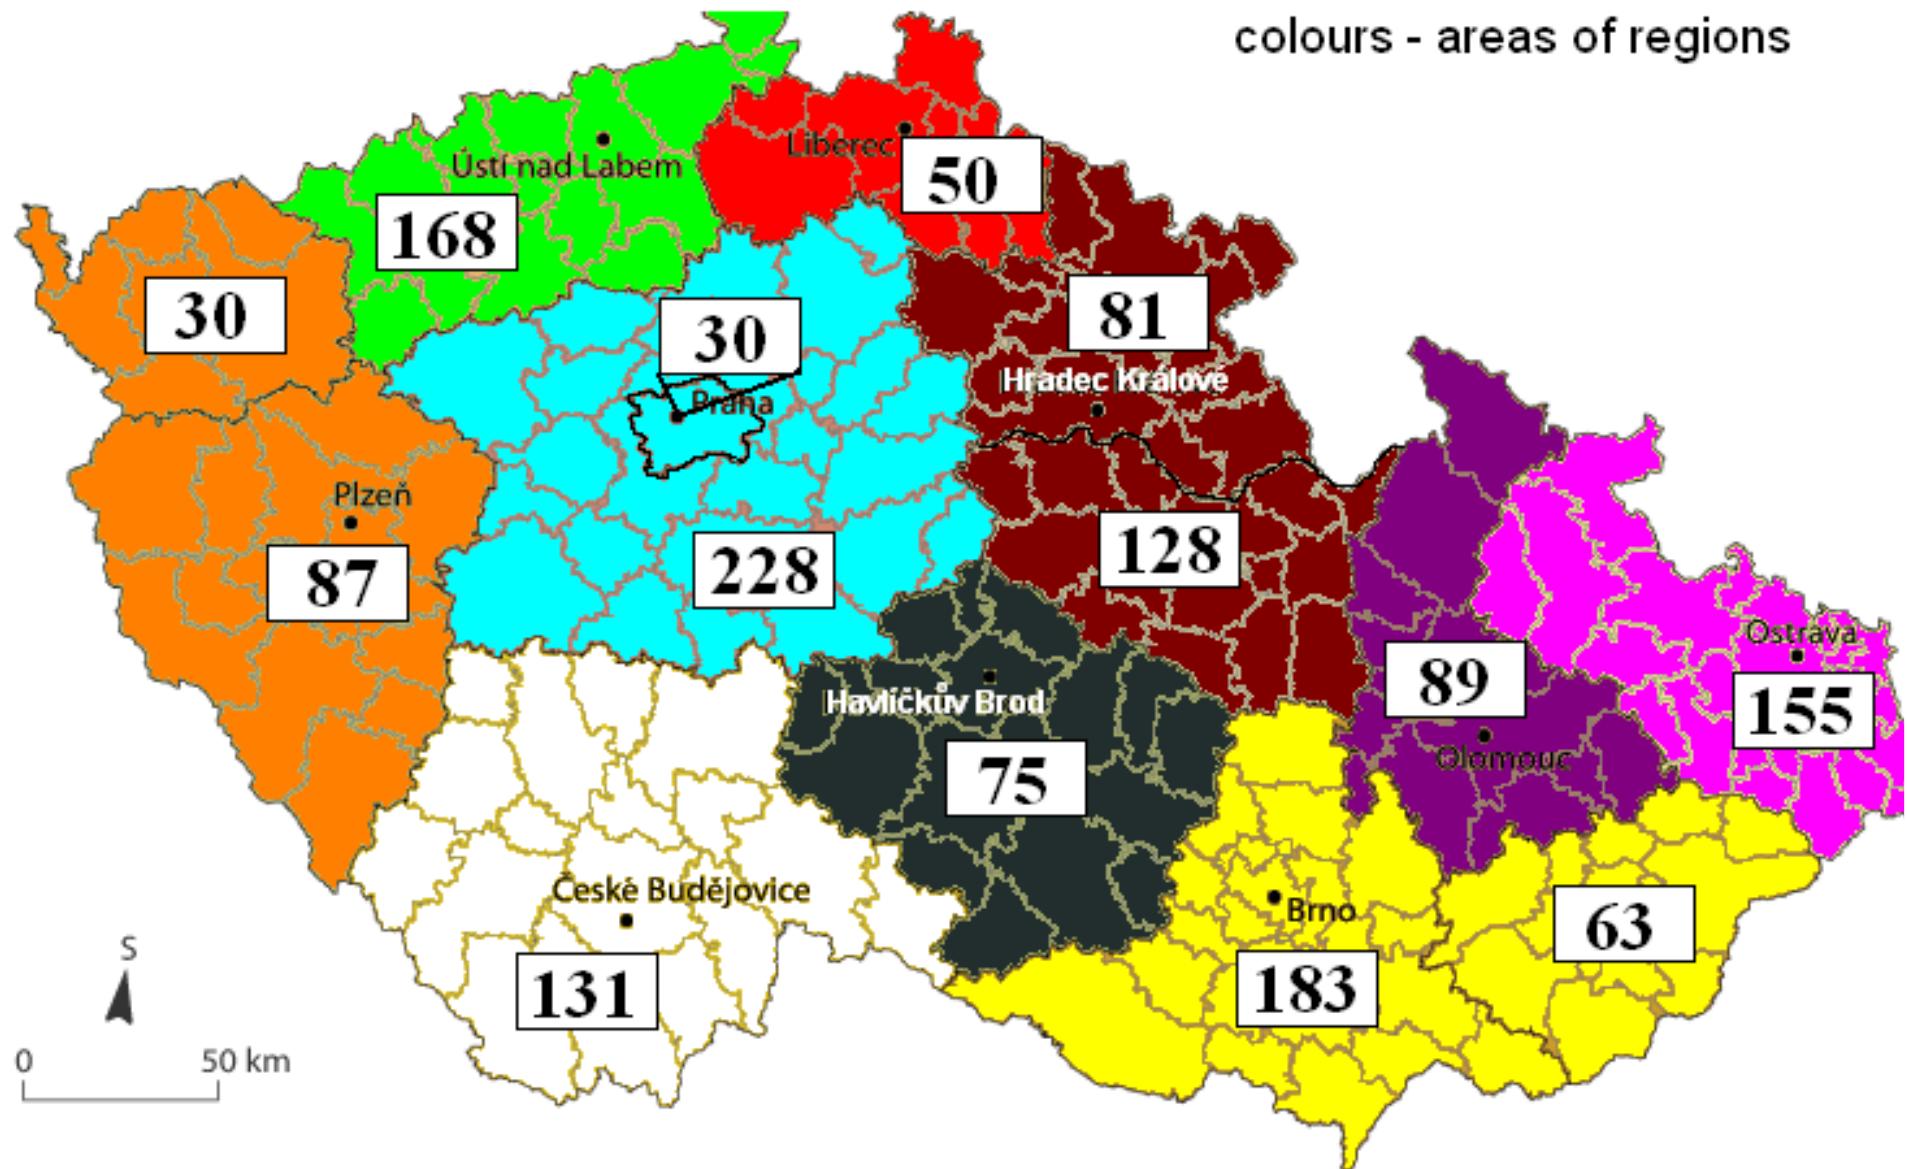

IPPC Activities:

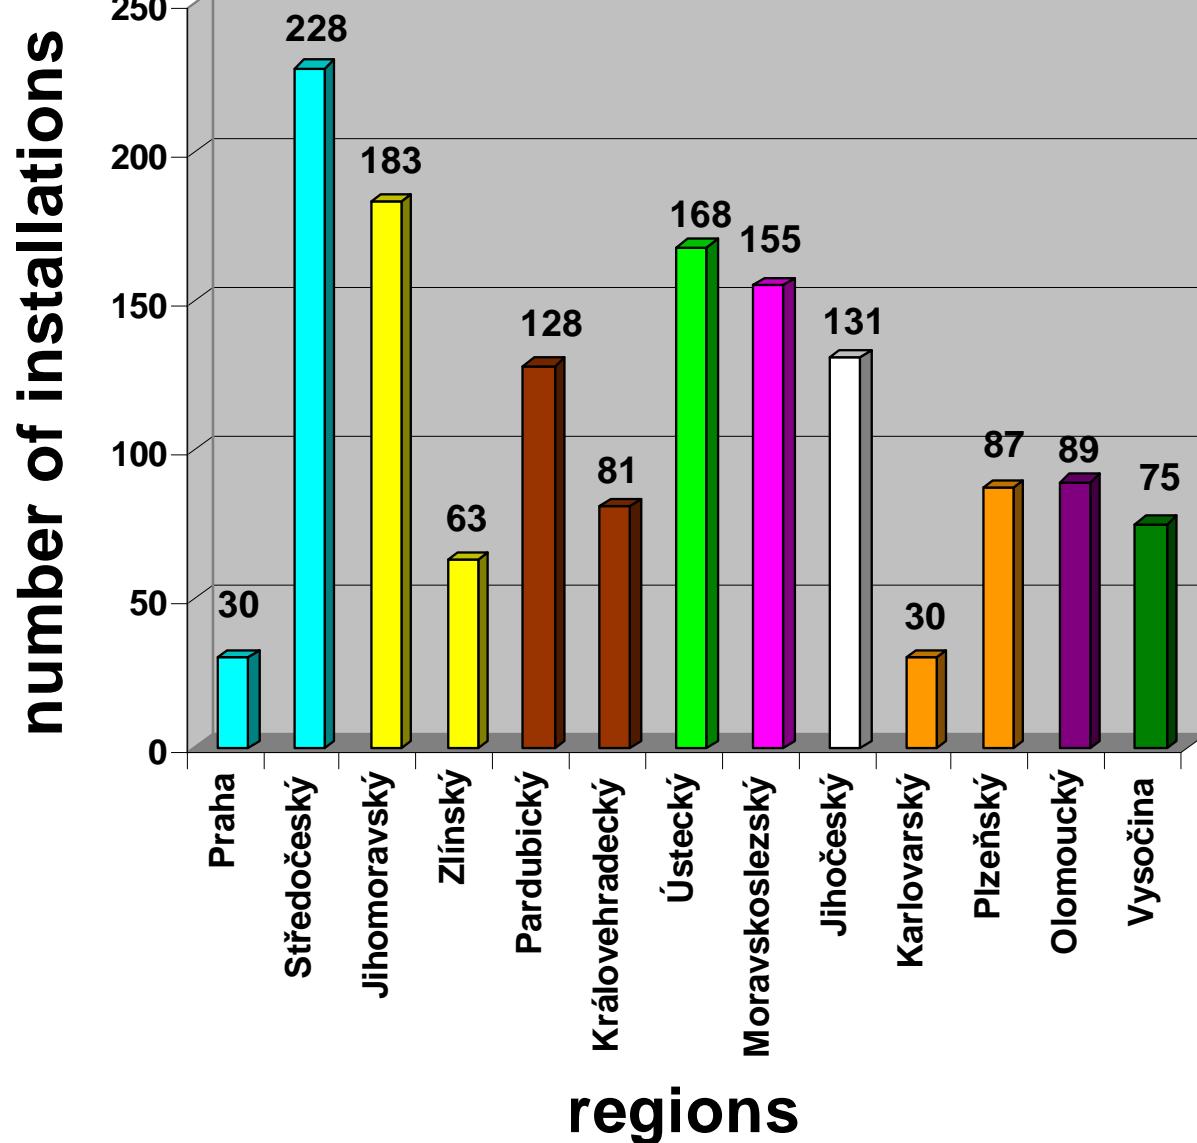

- Limit or stopping of installation operation
- Decision on penalties
- Evaluating of BAT applications
- Collaboration with local authorities

Numbers of IPPC Installations in Regions

the borderline of regions

colours - areas of regions

Monitoring of IPPC Installtions

Regional Authority

- Annual reports on compliance with IP by operators
- Review of permit conditions

CE Inspectorate

- Control of operator's obligations within the Act
- Performance of air and waste water pollution independent analyses
- Checking data reported to environmental databases

CEI Procedure in the Control of IPPC Installations

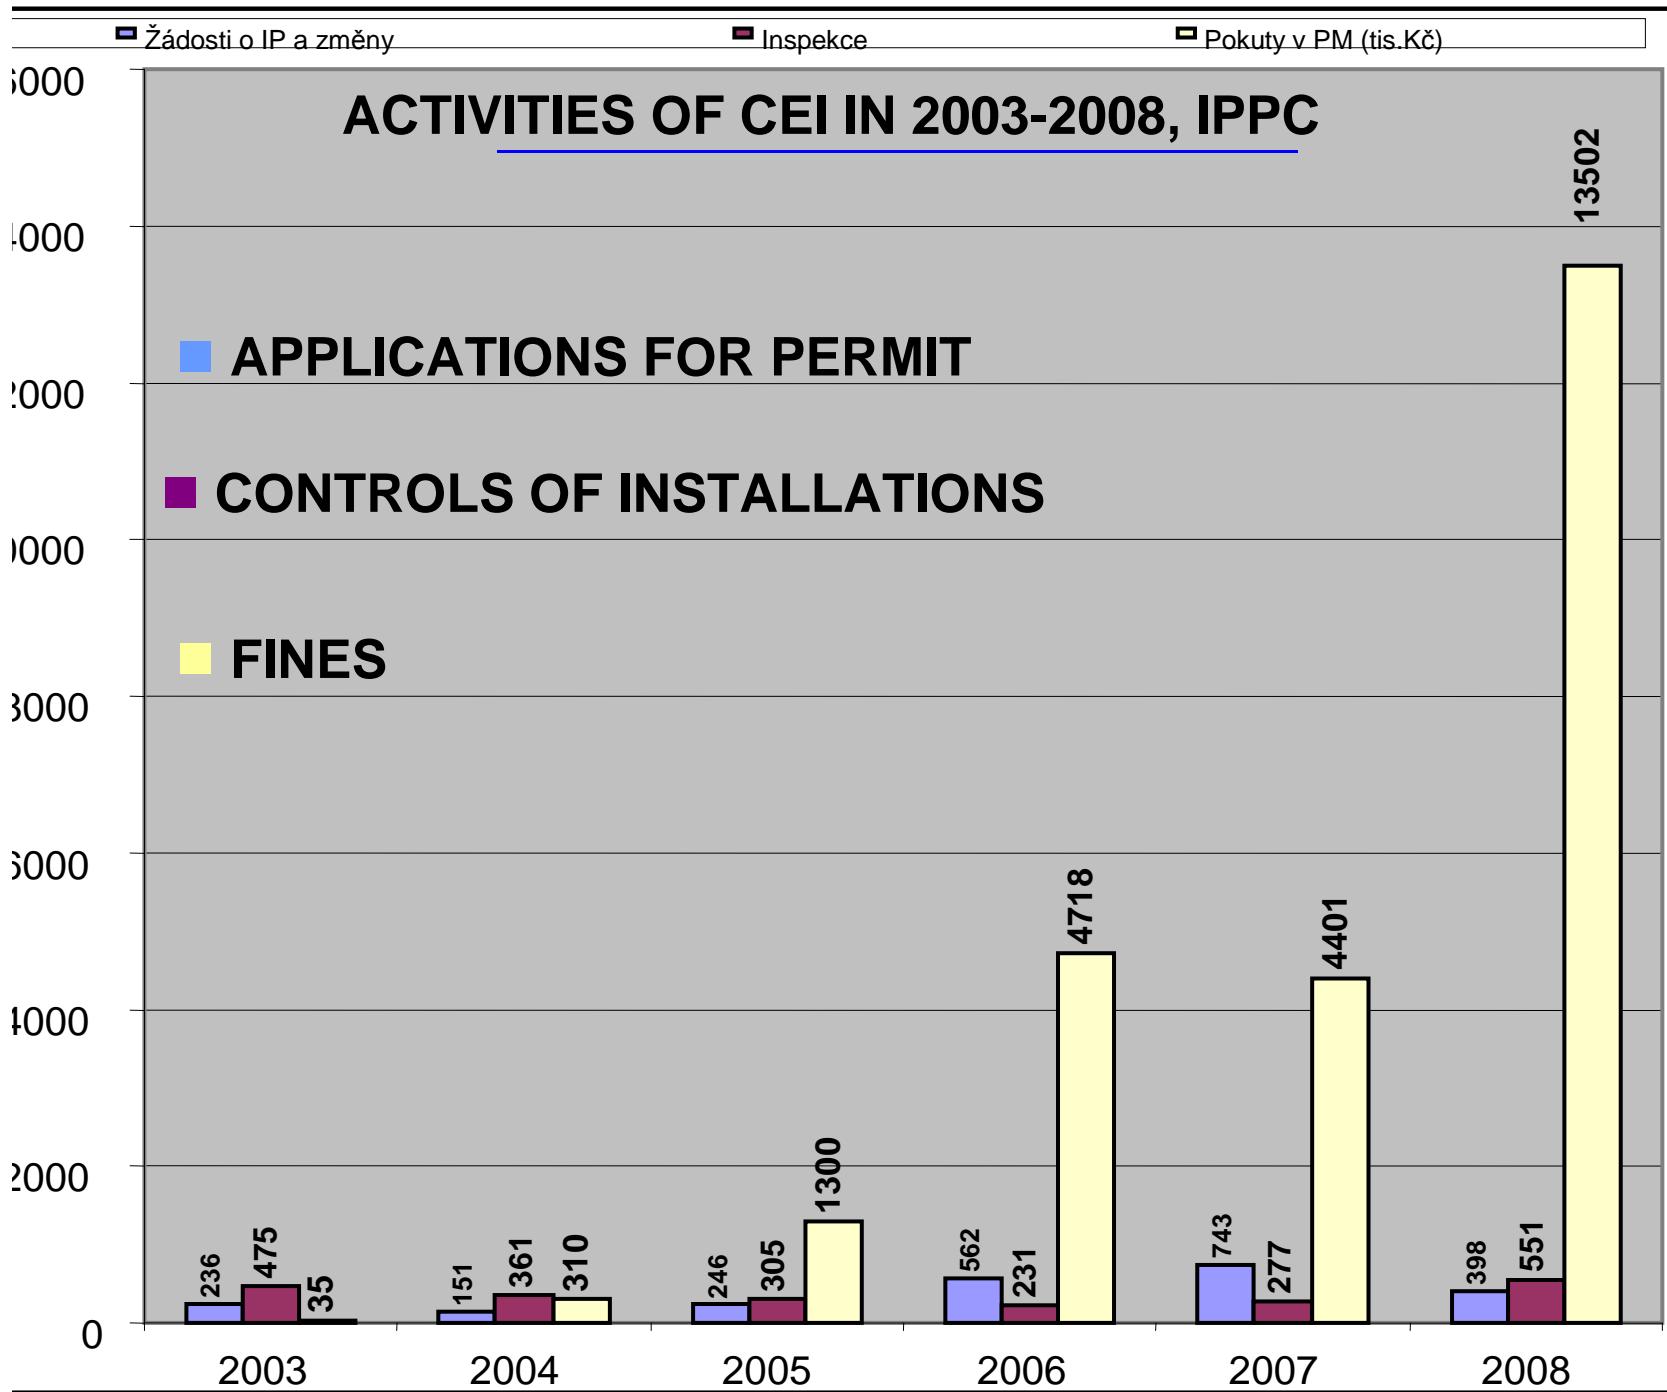

- Control coordination
- Preparation of relevant documents
- Cooperation with local authorities
- Communication with the operator
- Protocol on the findings
- Submission of the findings to local authorities
- Decision on the fine
- Reviewing of the measures imposed

Most frequent findings

- Unauthorized hazardous waste disposal
- Exceeding of emission limits for air or water pollutants
- Unannounced changes in operation of installations
- Operating installations without integrated permission (47)

INTENSITY OF INSPECTION ACTIVITIES IN 2008

- **551 complex integrated inspections**
- Imposed total of **144 penalties (IPPC)** in sum of **13.499.000,- CZK** (approximately 520. 000 €)
- **398 opinions on applications** for issue of integrated permit or permit changes – compared to 249 in previous year
- **2 220 opinions** on projects within EIA and etc.

Moravosilesian Region in Brief

Characteristics	Data
Area	5,554 sq. km.
Population (01-03-01)	1,264,540 (1,156,984 Prague)
Population Density	230 inhabitants per sq. km.
Capital of the Region - Ostrava	316,744 inhabitants

A region with the highest population rate in the Czech Republic.

Population density - 230 inhabitants per sq. km

National average - 130 inhabitants per sq. km

The area is densely populated and is characterized by a high concentration of industry.

OSTRAVA, THE CAPITAL OF MORAVOSILESIAN REGION

Old Ecological Burdens

- Liquidation of slurry ponds after the mining activity
- Restoration of the old coke plant area in the centre of Ostrava (35 hectares – 1 billion CZK/30 million USD)
- Removal of spent oils ponds – transfer of ownership back to the state (expected costs 4.5 billion CZK/100 million USD)

SUMMARY OF INSTALLATIONS BY CATEGORIES (ANNEX 1 OF IPPC ACT) IN MS REGION

- Total of 155 IPPC installations
- Several operators in one industrial complex
- The biggest polluters
 - Coke Plants
 - Blast Furnace
 - Steelworks
 - Rolling Mills
 - Machinery & Foundry Plants
 - Combustion Power Plants
- 24 integrated controls per year
- Complaints about dust, odour, noise

Removal of spent oil ponds (lagoons)

Old Ecological Burden – New IPPC Installation

- Category 5.1. – installation for the disposal or recovery of hazardous waste with a capacity exceeding 10 tonnes per day
- Production of alternative fuel for power plants
- Integrated authorization includes continuous odour monitoring to detect levels in nearby apartment blocks
- Many complaints about the smell of lagoons in summertime

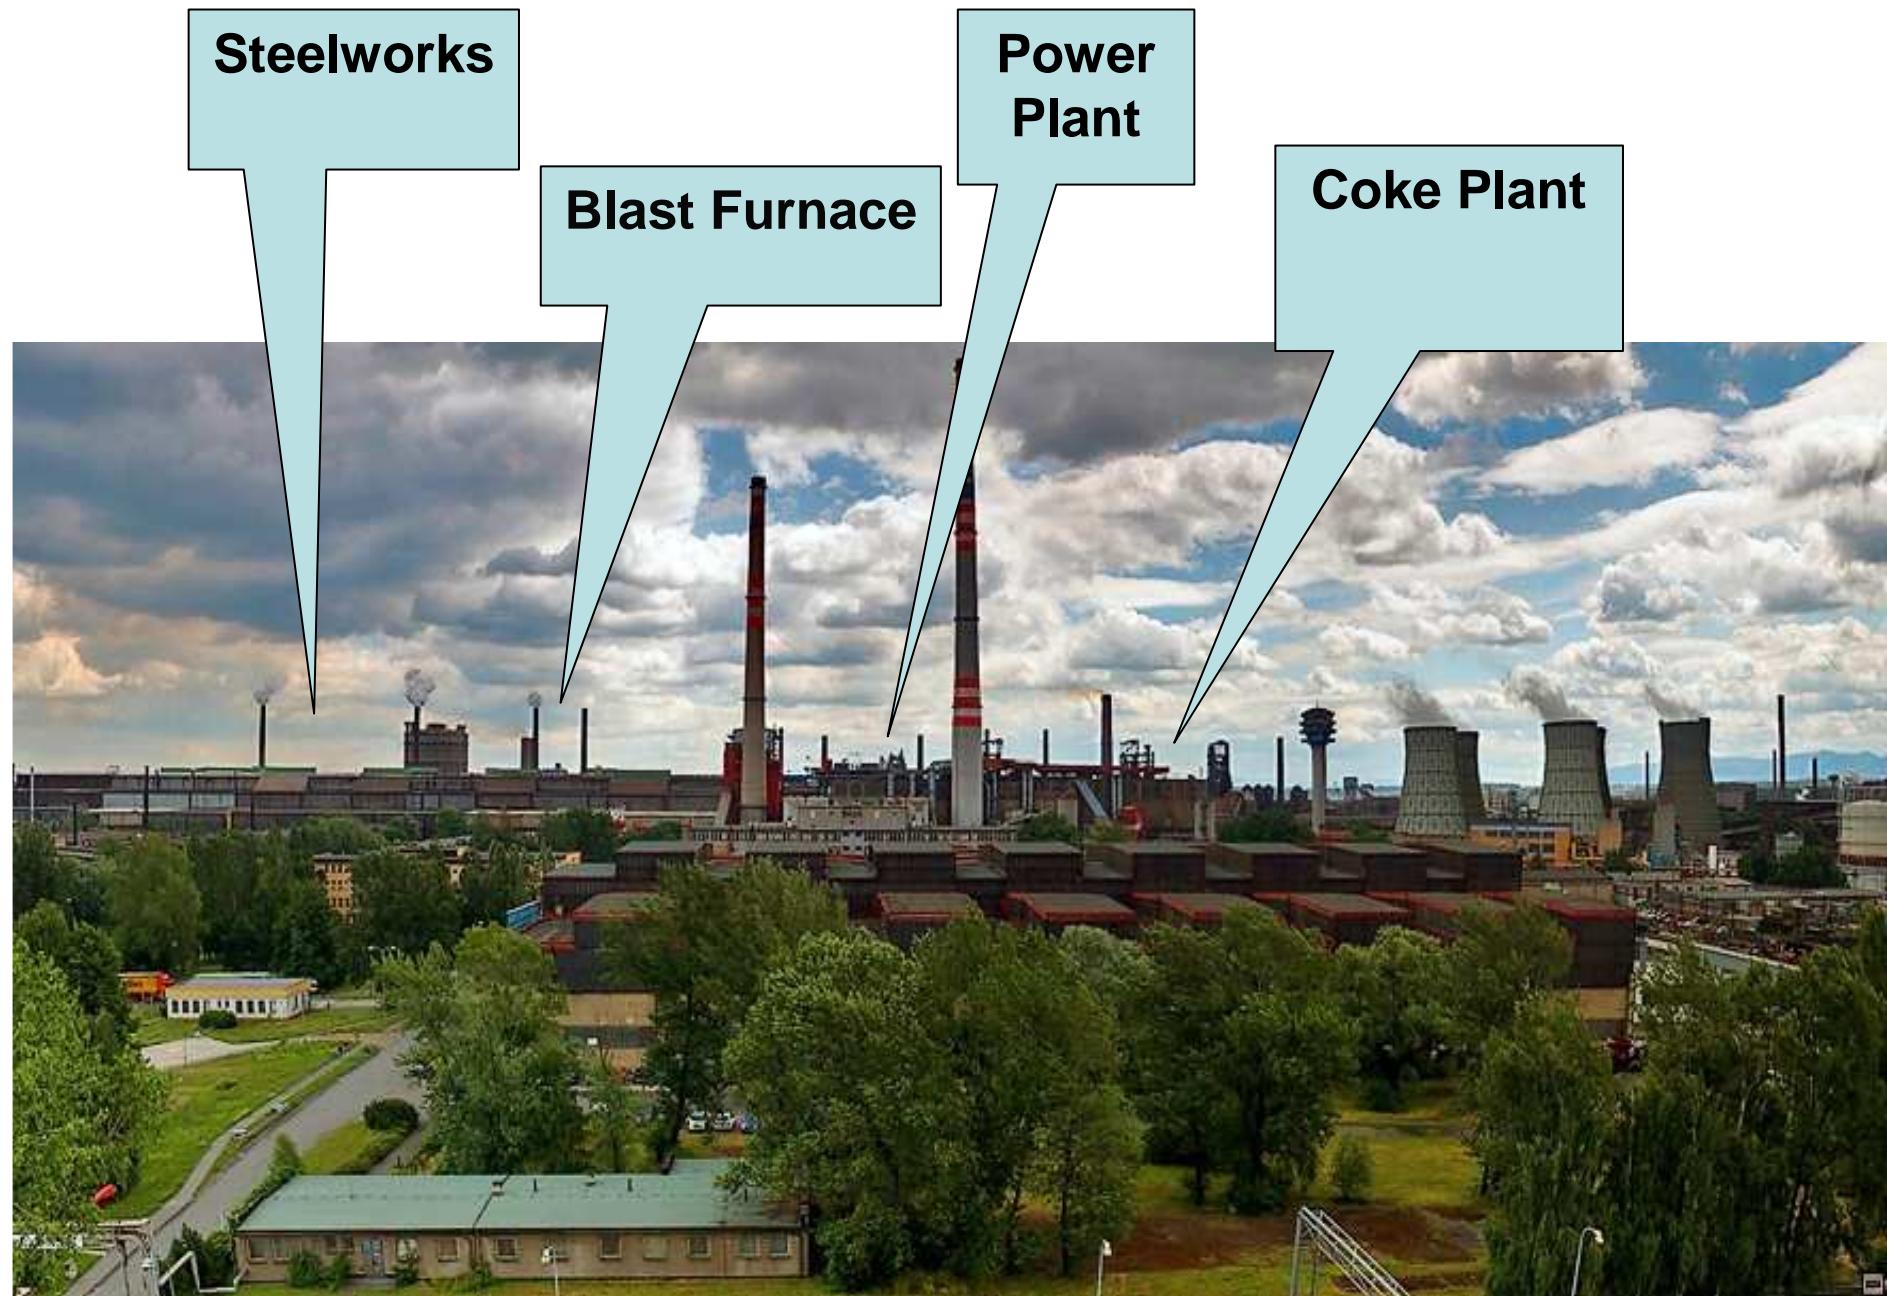

TRADITIONAL METALLURGICAL PLANT

- The largest employer in the region
- The plant with more than a century old tradition
- Complaints by local residents
- Controlled by NGOs

- Schedule of technology modernization
- The frequency of premises cleaning doubled - for 2008 collected 1800 tons of dust (from fugitive emission sources), which is about 1000 tons more than in 2007
- The project of secondary steel dedusting has been completed, so the notorious red smoke is gone
- Planting of 1111 trees in the Ostrava region in 2009
